Relevant Experience

Frontend Developer · **Cognizant** Aug 2022 — Present

- Developed and maintained responsive, user-friendly web applications for Verizon's troubleshooting platforms, enhancing customer engagement and satisfaction

- Utilized frontend technologies mainly React, JavaScript and CSS to build dynamic and performant user interfaces, improving application scalability and maintainability

- Integrated RESTful APIs and third-party services to enhance functionality and deliver real-time data updates, optimizing overall user experience

- Performed rigorous testing and debugging to identify and resolve issues, ensuring high performance and reliability

- Engaged with Agile methodologies, participating in sprint planning, stand-ups, and retrospectives to drive continuous improvement and timely delivery of features

- Worked on an internal dashboard web application for an in-house projects database using React for front-end

Web Developer · **SF Hacks @ SFSU** June 2021 — June 2022

- Organized one of the biggest Hackathons in the Bay Area
- Collaborated with cross-functional teams, including developers, designers, mentors, and judges, to create a dynamic and inclusive environment for participants
- Developed, maintained, and shipped production code for the official SF Hacks website primarily using React (sfhacks.io)

Frontend Developer Intern · **Bluload** June 2021 — Aug 2021

- Built and shipped production code for Bluload.com, which is a client booking and follow-up system designed for simplicity, using JavaScript, HTML and CSS
